

Crizandro Sonny G. Dela Cruz

Full-Stack Developer

Irosin, Sorsogon · +63 991 496 2099 · sonnygdelacruz@gmail.com · github.com/koala-bonjing · sonnydelacruz.vercel.app · www.linkedin.com/in/crizandro-sonny-dela-cruz-78207b224

PROFESSIONAL SUMMARY

Frontend-focused full-stack developer with professional experience shipping React/TypeScript interfaces in a Scrum Agile environment and contributing security-critical features such as RBAC, and audit logging to a production healthcare LIS. Hands-on across React, Node.js, REST APIs, and relational databases, with multiple deployed applications in production. Seeking a frontend or full-stack role where clean code and real-world impact are the standard.

EXPERIENCE

OnDemand Innovation

Oct 2025 – Feb 2026 | Remote

Frontend Developer Intern

- Delivered production-ready frontend interfaces for a live client project by developing React/TypeScript UI components within an 8-person Scrum team across daily stand-ups, sprint reviews, and PR code reviews
- Ensured reliable client-server data flow across all assigned frontend modules by integrating RESTful APIs backed by PostgreSQL and owning the data-binding and error-handling layer
- Maintained code quality standards across a team of 8 by participating in PR reviews and enforcing GitHub CI/CD pipelines with automated linting, unit tests, and deploy checks on every merge
- Preserved team knowledge continuity throughout the project by documenting sprint decisions and technical blockers in Confluence, keeping records handoff-ready at all times

LabXchange Healthcare LIS

2025 – 2026 | OJT

Frontend Developer (Production Contribution)

- Contributed to access control in a production healthcare LIS by implementing RBAC role hierarchy management as a module feature and building a CRUD-based audit log table for tracking user activity.
- Eliminated duplicate data-fetching logic across all data-dependent modules system-wide by building a reusable table refresh component that standardized async state handling
- Improved report accuracy and output consistency across modules by engineering dynamic biometric print documents fully configurable per organization
- Strengthened reliability of external service integrations by upgrading third-party forms with revised API validation and MRE Draft Status filtering, covering all integration flows with Vitest unit tests

KRISDOM IN GO

2026 | Freelance / Contract

Full-Stack Developer (Contract)

- Eliminated manual spreadsheet-based fleet monitoring for a logistics client by building a full-stack truck operations platform from scratch covering booking, dispatch, fleet status, trip logs, billing, and POD file management
- Enabled multi-format data reporting for fleet coordinators by implementing dynamic drop-off fields, client-side pagination, and export hooks (PDF, XLSX, DOCX) using shared React Context across all modules
- Took the system from zero to active production, supporting the client's full day-to-day fleet operations end-to-end

OutSource Inc.

2026 | Sorsogon

Data Collection Specialist & Data Annotator

- Maintained annotation quality across motion capture datasets against company QA standards by processing, validating, and preparing data for production AI training pipelines
- Reduced data errors across AI model training deliverables by reviewing annotation batches for label consistency before each submission

PROJECTS

CCDI Automated Career Assessment Test

MERN Stack · Google Gemini API · JWT Authentication · Brevo · Vercel

- Replaced institutional paper-based admission testing across 8 programs by designing and building a full-stack AI-powered career assessment platform used by all future CCDI enrollees
- Automated manual student response evaluation for all respondents by integrating Google Gemini AI to analyze answers and generate personalized course recommendations
- Onboarded 100+ enrollees in the first admission cycle by deploying on Vercel for institutional use — validated as highly acceptable by 43 students and 3 IT experts in a formal ISO 25010 evaluation

Sorsogon Virtual Tour — Mobile Application

WorldSkills ITSSB

Java · Android Studio · Firebase

- Delivered a fully functional Android tourism application meeting WorldSkills ITSSB specifications by implementing custom 6-character alphanumeric Captcha login, an interactive municipality map with live destination tracking, and real-time Firebase data sync

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java (Android) · Python (scripting/automation)

Frontend: React, Next.js, Tailwind CSS, shadcn/ui, Mantine UI, TanStack Query, Zustand, GSAP

Backend: Node.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL, Firebase, Supabase, Drizzle ORM

Testing: Vitest, Zod, ESLint, Prettier, GitHub Actions

Auth & Security: JWT, OAuth, 2FA, RBAC, Session Management

Tools: Git, Vercel, Figma, VS Code, Android Studio, Linear, Confluence

AI Integration: Google Gemini API, Data Annotation, AI Training Pipelines

EDUCATION

Computer Communication Development Institute

2022 – 2026

BS Computer Science · Proficiency Award in Database Management

Gabao National High School

2017 – 2022

Junior – Senior High School · With Honors

CERTIFICATIONS

- Build a Faster, More Structured Express API with Node.js and TypeScript — LinkedIn Learning (2025)
- TypeScript: Object-Oriented Programming — LinkedIn Learning (2025)
- Learning TypeScript — LinkedIn Learning (2025)
- React: Using TypeScript — LinkedIn Learning (2025)
